Save our Cider

The Government has announced a 10% increase in cider duty with more to follow. This will have a serious impact on craft-cider makers and the industry in general. Please sign Richard Younger-Ross's petition to ask the Chancellor to reverse this tax in the inevitable post-election Budget.

To The Chancellor of the Exchequer

We the undersigned call on you to reverse his rise in duty on Cider at the earliest possible opportunity. We believe this tax will endanger a traditional industry in particular the craft-cider makers and will have no impact on drink-related anti-social behaviour.
